

DIGIFORT ZI DASHBOARD

Smart Counting & Real-Time Insights

digifort

SIMPLE | POWERFUL | TRUSTED

DIGIFORT Z1 DASHBOARD

Monitor People, Objects, and Vehicles Instantly

Z1 dashboard brings all your analytics and license plate recognition's metadata into a single dashboard of insights, trends, and reports, giving you a complete picture in one place.

Note: Z1 doesn't connect directly to Analytics or LPR engines; instead, the Digifort ISMS Platform collects all metadata from these systems and feeds it into Z1.

Core Capabilities

Vehicle Monitoring & Occupancy Insights

Real-Time Dashboards & Historical Records of:

- Global Event Counting
- People & Object Counting

- With real-time analytics and license plate recognition that are integrated with Digifort

DIGIFORT ZI DASHBOARD

Counting, Visualization & Occupancy

✓ Provides both real-time and historical counting.

✓ Supports Digifort VCA, camera analytics, and external servers.

✓ Occupancy charts by period.

✓ Multiple visualization formats: Line charts, Bar charts, Pie charts, Doughnut charts

✓ Real-time counting panels displaying:

- Number of detected objects (people, cars, etc.)
- Maximum occupancy thresholds (people, vehicles, etc.)

DIGIFORT ZI DASHBOARD

LPR Integration, Event Monitoring & Specifications

LPR Meta data

- Counting by confidence levels (high, medium, low).
- Vehicle speed detection (when supported by engine).
- Restricted plate alerts via Digifort LPR Bridge.
- Vehicle type breakdown: car, motorcycle, truck, bus.
- Chart generation for plates included in Digifort's LPR lists.

Technical Specifications

- Compatible with Digifort VCA, edge-enabled cameras, and external analytic servers.
- Visualization formats: line, bar, pie, doughnut.
- Integration: Digifort LPR Bridge, global events.
- Output Panels: real-time counters, occupancy with threshold alerts.
